

SCHOOL CLIMATE & STUDENT LIFE

ACTION PLAN

This page denotes the plans that have been developed for action in years 1 & 2 (above the line) as well as the priority order for the remaining goals. The goals above the line were determined to be the most in need and in many cases either encompassed elements of the goals below, or were needed to be accomplished prior to the other goals being started. Please know that the goals below the line are not being dismissed, but rather will continuously be reviewed to identify the perfect time for their incorporation. Year 1 & 2 goals have been developed into action plans and are included in this document.

YEARS 1 & 2

1. Review and enhance student input mechanisms and leadership opportunities (more voice/more choice).
 2. Review student elective options based on the strategic vision, student input (survey) and on the quality of student life. Make suggestions for revision of electives as appropriate.
 3. Expand programs that promote a culture of community, emphasize pro-social behavior, and recognize and encourage the development of respectful, inclusive and supportive environments for all stakeholders.
-
4. Review the quality and satisfaction with the school lunch program and lunchroom environment based on nutritional and health needs, cost effectiveness, and customer (student) satisfaction. Incorporate changes as appropriate.
 5. Develop and promote—across programs— a student awareness, appreciation and responsibility for the environment, entrepreneurial spirit and for civic involvement.
 6. Review intramural and inter-school athletic activities for effectiveness in preparing the “whole student” for life.
